I am lost ……

……but I know where I want to go

I may not understand the jargon……

……but I can understand the need and potential

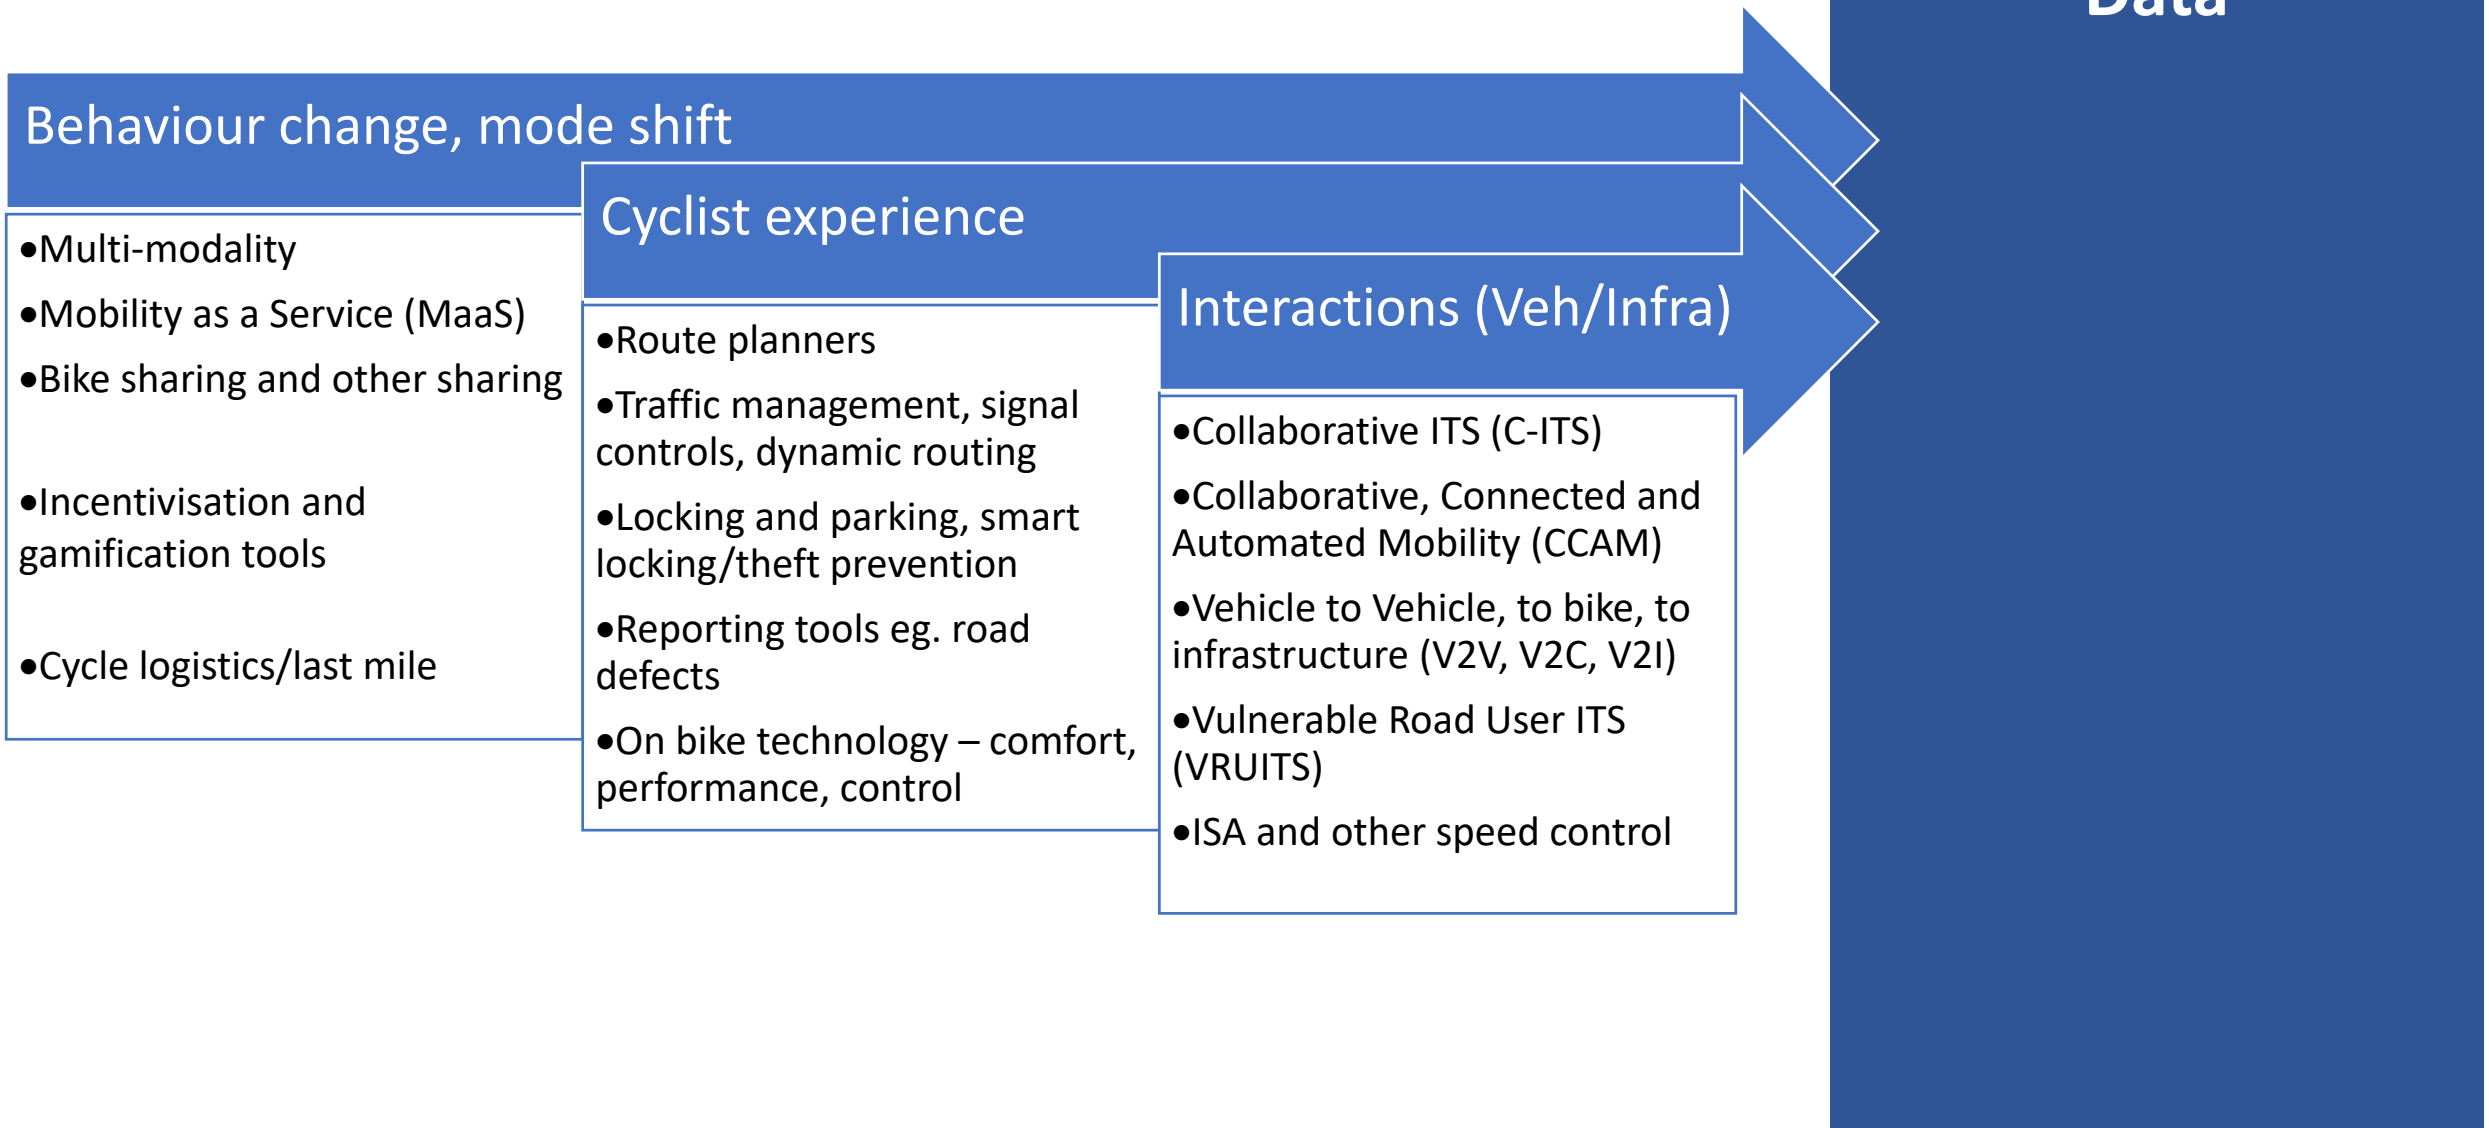
Cycling ITS
Typology >> Framework >>Roadmap?



Cycling ITS
Typology >> Framework >>Roadmap?

Behaviour change, mode shift

- Multi-modality
- Mobility as a Service (MaaS)
- Bike sharing and other sharing
- Incentivisation and gamification tools
- Cycle logistics/last mile

Cyclist experience

- Route planners
- Traffic management, signal controls, dynamic routing
- Locking and parking, smart locking/theft prevention
- Reporting tools eg. road defects
- On bike technology – comfort, performance, control

Interactions (Veh/Infra)

- Collaborative ITS (C-ITS)
- Collaborative, Connected and Automated Mobility (CCAM)
- Vehicle to Vehicle, to bike, to infrastructure (V2V, V2C, V2I)
- Vulnerable Road User ITS (VRUITS)
- ISA and other speed control

Data

BIG Data

Data for infrastructure planning, commissioning and funding proposals

Privacy, data security, ownership (GDPR)

EU's National Access Points (national data sets)

Counting, measuring, aggregation

Research & market intelligence
